Mission Information:

Objective / Description: Perimeter monitoring and heat sources location.

North (DMS): D: 35 M: 3 East (DMS): D: -119 M: 51
 South (DMS): D: 34 M: 49 West (DMS): D: -120 M: 13
 NE/SE to NW/SW (longitude): 14 NM
 NE/NW to SE/SW (latitude): 17 NM

Comments: Things did go smoothly last night. I always like the color IR strips too, but it was nice to have the data with no snags from the ftp site. The fire was very cool last night with only a small amount of growth in the east and even that was cooled off and not active by the time of the flight. There were ten internal hot spots.
